Hairspray
Spray Adhesive
Rubbing Alcohol

Installation Instructions

1. Clean the surface of the handlebar where the grips will go with rubbing alcohol.
2. Spray a small amount of hairspray inside the grip and slide the grip all the way onto the bar. Allow to dry overnight before riding.

⚠ WARNING: Do not ride the bike immediately after installing grips this way! The hairspray will not have dried fully and the grips could slide off the bars resulting in a serious crash or even death. Ideally, the hairspray should be allowed to dry overnight just to be safe.

3. If, after drying, the grips still move or slide, remove them and repeat Step #2, allowing the grips to dry again overnight.

⚠ WARNING: Periodically make sure that the grips do not slide or twist excessively. Loose grips could slide off the bars resulting in a serious crash or even death.
