Tools required

Phillips head screwdriver

9mm open end wrench

Compatibility

Verify with the pedal manufacturer that the pedal model will accommodate toe clips and straps.

Installation

1. Remove the front reflector attached to the pedal if present.

NOTE: We strongly recommend that the reflector be replaced by another reflector or a reflective surface such as an adhesive-backed tape.

2. Line up the boltholes or slots in the bottom of the metal clip with the bolt holes on front of the pedal.

3. Push the bolts through the clip and the pedal and tighten the nuts with a wrench or Allen key.

⚠ WARNING: Periodically check to make sure the toe clip bolts are tight. Loose toe clips could cause a loss of control that could result in a crash causing serious injury or even death.
