## Compatibility & Intended Use

The All-City Shot Collar is available in multiple sizes. Check with your frame manufacturer for the correct size.

**⚠ WARNING:** Incorrectly sized seatpost collars could cause the seatpost to slip while riding and lead to serious injury.

**NOTE:** Make sure that your frame seat tube is free of any burrs or peeled paint. It may be necessary to gently sand the frame to achieve a smooth finish.

## Tools:

4mm Allen wrench

Torque wrench

Assembly compound

## Shot Collar Installation

1. Apply a thin layer of assembly compound to the top of your seat tube.
2. Slide the collar onto your frame. The slot in the collar should face towards the back of the bike, regardless of frame slot location, and the inner lip of the collar should sit flush on top of the seat tube.
3. Apply assembly compound to seatpost and inside of seat tube and insert into frame.  
**⚠ WARNING:** The seatpost must be inserted into the frame below the minimum insertion line marked on the seatpost.
4. Tighten the M5 bolt with a 4mm Allen wrench to 3–5Nm or manufacturer's recommended frame/post torque setting, whichever is lowest.

## Ongoing Maintenance

Periodically make sure the Shot Collar is tightened to the proper torque.
